

Data Extraction Guidelines

Costed NAPHS

This short document outlines the process for extracting data from publicly available costed National Action Plans for Health Security (NAPHS). The goal of this work is to create a publicly-available, machine-readable data resource to support additional analysis of health security financing requirements.

Inclusion criteria

This project includes line-item level data on actions costed within the NAPHS. It does not include data from countries who only report aggregate data (e.g., total costs summarized the core capacity level), for example, North Macedonia or Tanzania. It also excludes countries that only report priority actions with no associated cost data.

Level of resolution

When extracting data from a given costed NAPHS PDF document, please enter the data at the most granular level reported (e.g., per year), with one row per cost reported in the NAPHS. For example, the following data reported in Liberia's costed national action plans should be reported in five rows of the data entry spreadsheet, as illustrated below.

Strengthen human resource capacity, information sharing and mandate of the IHR / One Health in animal, human and environmental sector										
Support 15 counties with established and functional OH platform including TWG - hold monthly meetings for 20 person per county per year	1	1	1	1	1	246000	246000	246000	246000	1230000

A	B	C	D	E	F	G	H
Country	Capacity	Requirement	Action	Year (1-5)	Year (calendar)	Cost	Currency (year)
Liberia	P.3 IHR Coordination, National IHR Focal Point Functions and Advocacy	Strengthen human resource capacity, information sharing and mandate of the IHR / One Health in animal, human and environmental sector	Support 15 counties with established and functional OH platform including TWG - hold monthly meetings for 20 person per county per year	1	2018	246000	USD (2018)
Liberia	P.3 IHR Coordination, National IHR Focal Point Functions and Advocacy	Strengthen human resource capacity, information sharing and mandate of the IHR / One Health in animal, human and environmental sector	Support 15 counties with established and functional OH platform including TWG - hold monthly meetings for 20 person per county per year	2	2019	246000	USD (2018)
Liberia	P.3 IHR Coordination, National IHR Focal Point Functions and Advocacy	Strengthen human resource capacity, information sharing and mandate of the IHR / One Health in animal, human and environmental sector	Support 15 counties with established and functional OH platform including TWG - hold monthly meetings for 20 person per county per year	3	2020	246000	USD (2018)
Liberia	P.3 IHR Coordination, National IHR Focal Point Functions and Advocacy	Strengthen human resource capacity, information sharing and mandate of the IHR / One Health in animal, human and environmental sector	Support 15 counties with established and functional OH platform including TWG - hold monthly meetings for 20 person per county per year	4	2021	246000	USD (2018)
Liberia	P.3 IHR Coordination, National IHR Focal Point Functions and Advocacy	Strengthen human resource capacity, information sharing and mandate of the IHR / One Health in animal, human and environmental sector	Support 15 counties with established and functional OH platform including TWG - hold monthly meetings for 20 person per county per year	5	2022	246000	USD (2018)

Years

For each year for which data are reported, please enter both the year relative to the completion of the costed NAPHS (e.g., 1) and the calendar year (e.g., 2018).

- If costs are reported across multiple years, **without yearly-level data available**, please list individual years separated by a comma, for example, “1,2,3” or “2018, 2019, 2020”
- Similarly, if costs are reported for two non-consecutive years, please list years separated by a comma, for example, 1,3 and 2018, 2020.

Missing data vs. Non-costed items

If a given action is only indicated for certain years, only enter rows of data for the indicated years. Importantly, this is not to be confused with costs that are listed as “No cost,” “Zero cost,” which *are* included in different line items. **These should be indicated as “N/A.”** Please report all available data elements.

Currency

All data should be reported in the currency reported in the published NAPHS document, with the currency and year entered in the appropriate column of the data entry sheet. If the year of the currency is not specified, assume the currency is calculated as of the year that the NAPHS was published.

Language

All data should be reported on the language in which they were initially reported in the published costed NAPHS document. For instance, Benin’s costed NAPHS, which is reported in French, should be entered verbatim, in French, into the data entry spreadsheet. Please use copy-paste wherever possible.

Quality Assurance (Q/A)

All data should be reviewed by a minimum of two coders to ensure alignment to the original costed NAPHS document.
